

SECTION 07550
GUTTERS AND DOWNSPOUTS

PART 1 – GENERAL

1.1 DESCRIPTION

- A. Prior to the job start, the applicator will decide that all the Specifications are workable as specified, to his satisfaction, also, that there is nothing that would prevent his required 5 year labor and 10 year material warranty, and that no existing conditions at the job site prevent the applicator from performing the job in a professional and safe manner. It is concluded that the specifications are approved by the applicator upon job start.

- B. The Contractor shall follow all Soprema Manufacturer Specifications
 - 1. Insulation shall be tapered.
 - 2. See attachment for product data on roofing system.

PART 2 - MATERIALS

- A. All flashing, vents, piping, curbs, mechanical equipment, and parapet caps shall be installed as per Soprema Specifications. Contractor shall weather-proof the parapet cap with an approved sealant.
